Curatronic
Mr. Ben Philipson
P. O. Box 1932
Hashmonaim, Israel 73127

Dear Mr. Philipson:

It was a pleasure speaking with you on Thursday about the Curatron 2000 XP Universal Therapy unit I ordered. I am grateful the Curatronic Company makes a product that helps people like me.

As I told you on the phone, I have been sick a great deal the last 22 years. I got asthma and allergies after having pneumonia 22 years ago. The Doctor told me my immune system was extremely compromised and I was unable to stay well for over a few months.

This last 3 or 4 years my health has deteriorated to the point I was using liquid albuterol sulfate in a nebulizer machine.

I'm telling you this because I was afraid I was going to die and I reached out to Dr. Robert Sklovsky, hoping he could help me.

Dr. Sklovsky put me on the Curatron 2000 PC unit for about the last 5 months and I have improved so much I am now able to exercise for the first time in a very long time. I also haven't used the nebulizer machine or been on any steroids to open my lungs so I could breathe. Another exciting thing is when I do too much aerobic exercise and my lungs tighten, if I rest for a small amount of time the restricted breathing returns to normal without medication. That has never happened in the last 22 years. This is so significant!

I am so happy I have found something to help my lungs heal and to have more energy. I am looking forward to using my Curatron 2000 XP unit often and I will enjoy continuing on this road to recovery.

Thank you so much!

Sincerely,

Lella Davis
